

Norway Lobster Sorting Table

Norway Lobster Sorting Table

To improve onboard handling efficiencies a specific Norway Lobster table has been designed. The stainless steel table allow crews to rapidly sort whole prawns, smaller prawns for tailing and discard material through a series of chutes. The table can either be used independently or can be integrated using water flow pipes with the automated de-heading to allow tailed Norway Lobster. This essentially allows direct feeding of Norway Lobster for automated de-heading.

*Receiving bin with automatic conveyance to sorting. Pumping of small Nephrops to tailing machine
